3421 Lumber Lane
Springfield, IL 62707

Step by Step:

Step 1:

Your Image Design™ Vinyl Stencil will come to you with a sticker on the back stating to **Peel This Side First!** There will also be a picture of the design attached to the back side. Keep the picture for reference. **Peel the white backing off.**

Step 2:

Apply your design to the prepared concrete substrate. Apply pressure to vinyl pushing air pockets to sides.

Image Designs™ “The How To”

Step by Step:

Let your imagination flow. Use Legacy™ Decorative Concrete Systems to create a unique floor for your home, office, interior or exterior projects. Great for patios, garage floors or driveways. Get everything you need to renovate your concrete at: Legacy™ Decorative Concrete Systems, Inc.

www.legacycolor.com

- Easy to Apply
- Create your own color schemes to accent your room.
- Over 5000 images available.

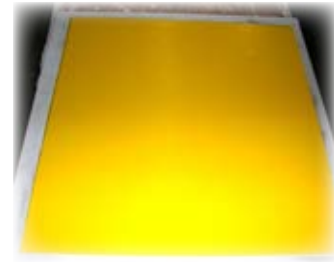

IDIS06/07

Step 3:

With a damp sponge rub over the transparent adhesive backing paper. Remove the transparent adhesive backing paper starting at a corner and pulling in a diagonal direction.

Step 4:

Now you can wick your design. Look at the picture that was attached and decide which part of the design you want to transfer, a positive or negative image.

Step 5:

You should now have your design wick-ed and be able to see the image. Apply Venetian MicroTop™, Perfetto~Espray™, Fresco Stain™ or Tinte' D'Acqua™ Stain to your design. Let dry.

Step 6:

Pull the vinyl off of the substrate and sweep off any residue.

Step 7:

Seal with any of our Legacy™ Protectants.
